

Deliverables & Scope Status

This is a status snapshot against the approved Project Scope (May 1, 2026). It maps the contract deliverables and the agreed scope of work to what is live today, what is still to follow, and the few items we need from BCJ to fully close out.

1. CONTRACT DELIVERABLES (SCOPE \$7)

#	DELIVERABLE	STATUS
1	Fully functional, branded platform - live web application	DELIVERED
2	Source code repository - private GitHub repo in BCJ's name (BCJ-IT)	DELIVERED
3	Cloud infrastructure account - Supabase + Vercel, owned by BCJ	DELIVERED
4	Database with Module 1 content + user accounts - loaded and live	DELIVERED
5	Domain & DNS configuration - controlled by BCJ	DELIVERED
6	Written user documentation - Admin, Department Lead & Employee guides (PDF) + in-app Help Center	DELIVERED
7	Account credentials handover - GitHub, Supabase, Vercel, Resend (sent separately)	DELIVERED
8	Admin training session recording - 60-min Loom	DELIVERED
9	Teacher training session recording - 30-min Loom	DELIVERED
10	Architecture & operations handover document	DELIVERED
11	UAT sign-off record	TO FOLLOW
12	30-day warranty support log - delivered at end of warranty period, per contract	AT PERIOD END

DELIVERED live now **TO FOLLOW** in progress / scheduled

2. SCOPE OF WORK COVERAGE (SCOPE \$4)

CAPABILITY	STATUS
Content delivery - Word, PowerPoint, PDF & video in-app, page-by-page, no download	DELIVERED
Quiz engine - multiple-choice, randomised, configurable length/time, 85% pass, instant result	DELIVERED
Retake logic - first-attempt + easier retake pools, auto-assigned; locked & flagged after 3 fails	DELIVERED
AI question authoring - AI drafts from content; BCJ approves/edits/regenerates/rejects before live	DELIVERED
Three user roles - Admin, Department Lead, Employee; one person can hold multiple	DELIVERED
Admin dashboard & reporting - program / per-manager / per-module views, at-risk list, one-click actions	DELIVERED
Notifications & reminders - invitations, reminders, results, at-risk alerts; templates editable by Admin	DELIVERED

CAPABILITY	STATUS
CSV export of results	DELIVERED
Optional - AI flashcards for self-study	DELIVERED
Optional - video watch progress (resume where left off)	DELIVERED

3. DELIVERED BEYOND THE ORIGINAL SCOPE - AT NO EXTRA COST

A number of features were built that were not in the original scope, to make the platform genuinely easier and safer for BCJ to run:

- ✓ **Bilingual - English & Español:** the whole employee experience and the quizzes (scope was English-only).
- ✓ **Branded completion certificate:** issued on every pass, printable, with a fully customisable editor (scope was a simple completion record).
- ✓ **Live presenter mode + 4-digit seminar check-in:** run the in-person session straight from the platform.
- ✓ **Resource hub:** shared documents with read-and-acknowledge sign-off and full version history.
- ✓ **Audit log:** every action recorded and filterable - sign-ins, passes, publishes, reminders and more.
- ✓ **Two-step verification:** optional 6-digit email code at login for extra account security.
- ✓ **Question analytics:** see exactly who answered each question right or wrong, with version history and one-click restore.
- ✓ **Content version history:** every content edit is snapshotted and can be restored.
- ✓ **Invited-only access:** employees see and take only the modules they have been invited to.
- ✓ **Flexible roles:** change anyone's role at any time (Employee ↔ Department Lead ↔ Admin) without losing their history.
- ✓ **Department Lead workspace:** leads see every module, can present or take any, and track their own progress.
- ✓ **Smart seminar scheduling:** pre-fills who is due and lets you search and add anyone else.
- ✓ **In-app Office viewer:** Word, PowerPoint, Excel and PDF preview in place - no downloads.
- ✓ **Branding controls:** platform name, colours, logo and email sender, all editable by Admin.

4. TO CLOSE OUT - WHAT WE NEED FROM BCJ

- **OpenAI (ChatGPT) API key** - so the AI question-writing runs under, and is billed to, BCJ's own account. This completes the AI handover.
- **Email-sending domain verification** - confirm the sending domain so all automated emails go out from BCJ's address.
- **UAT sign-off** - a quick review-and-sign once requirements are met following testing.

Your **30-day warranty (bug-testing) period** is now running: any defect - anything not behaving as described in the scope - is fixed at no cost during this window. New features are scoped and quoted separately, per the agreed change process.
