4 Spanish & language

Quick answers to common questions. Grouped by who's asking.

Every role has a **Help** link in the sidebar that opens this guide library inside the app.

The in-app Help Center

For Employees

How do I sign in?

Use your work email and password at your BCJ Learn link. If you have two-step verification, you'll also enter a 6-digit code emailed to you.

I forgot my password.

On the login screen click "**Forgot password?**", confirm your email, and click **Send reset link**. Open the link in your inbox to set a new password.

Why can't I take the quiz yet?

The quiz opens **after the live seminar**. You usually need to **check in** at the seminar (enter the 4-digit code on the room screen), and the trainer must **end the session**. If a module has **required resources**, you must sign them first.

I don't see a module I expected.

You only see modules you've been **invited** to. Ask your Department Lead or an Admin to add you to that module's roster — it'll appear right away.

Can I look at the materials before the seminar?

Yes — open the module and scroll to **Seminar outline**. Anything marked "**Available to preview now**" can be studied beforehand. It's optional but helpful.

What score do I need to pass?

85% by default (some modules may differ — the quiz intro shows the exact pass mark).

How many tries do I get?

Three total per module: your first attempt plus up to **two retakes**. Retakes cover the same material, reworded. After the 3rd miss the module locks and your trainer reaches out to help.

A retake got scheduled — what now?

Review the material, then take the retake from your module's status card or **My Progress**. It shows how many attempts you have left.

Where's my certificate?

After you pass, tap **View certificate** on the result screen or the module's status card, then **Print / Save as PDF**.

What does "Acknowledgement required" mean on a resource?

It's a read-and-understand sign-off. Open the resource, read it, and tap **"I have read and understood."** Some modules require this before the quiz unlocks. If a resource is updated you may need to acknowledge the new version.

How do I switch the app to Spanish?

Go to **My Profile** and use the **language** toggle (English / Español). The whole employee app and your quiz switch to the chosen language. If a question hasn't been translated yet, you'll see the English version so the quiz still works.

I missed the seminar.

Your trainer can reschedule you to the next delivery, or open the quiz for you. Check your **Notifications** and talk to your Department Lead.

Where do I see my history?

My Progress — every attempt with scores and dates, plus a module-by-module summary.

For Department Leads

Which modules can I see?

Every module — but you only **edit** the ones you **own** (Admins assign ownership). On modules you don't own you can still present, take the quiz yourself, and view results; the edit controls are just hidden.

Can I take a quiz myself, and where do I see my result?

Yes — open the module and tap **Take it yourself**. Your own attempts, scores, answer review, and certificates live under **My Progress** in your sidebar.

How do I get questions ready?

Upload your content (**Content**), then open **Questions** and click **Generate questions with AI**. Review each — **Approve**, **Edit**, **Regenerate**, or **Reject** — then **Publish**.

Can questions be generated after publishing?

Yes. You can generate/approve questions any time — just make sure they're ready **before the presentation**.

How do I run the seminar?

Open **Present in seminar** → **Open check-in** (shows the code) → **Start session** → present your content → **End session** (this opens the quiz to everyone who checked in).

How do I see who passed or struggled?

See results for the module: pass rate, score distribution, most-missed questions, and the roster of who attended and how they did. On any question, **Who answered** shows exactly who got it right or wrong with date/time.

How do I set the seminar time?

Schedule or reschedule the seminar with a **date and time**. The attendee list is pre-checked with everyone who hasn't passed in the last 12 months, and you can **search the directory to add anyone else**; the selected attendees are emailed automatically.

For Admins

What's the difference between Draft and Published?

Draft modules are visible to admins/leads but **hidden from employees**. **Published** modules are live for assigned employees. Use **Save as draft** to build quietly, then **Publish** when ready (or **Unpublish** to pull it back).

How do I add employees?

People → **Employees** → **Add employee** (one at a time) or **Bulk import** a CSV (`name,email,markets`). Invites email automatically.

What makes someone "at-risk"?

Any of: failed twice on a module, missed a deadline, no login in 14+ days, first attempt below 70%, or no attempt on an assigned module. Flags clear automatically when they pass a retake or log back in.

Can I customise the emails and certificate?

Yes. **Notifications** for email templates (with preview + send test). **Settings** → **Certificate** for the certificate wording, signatory, and logo. **Settings** → **Branding** for name, colours, logo, and the email sender address.

Who can see drafts and other leads' modules?

Admins see everything. Department Leads now see **every** module but only **edit** the ones they own. Employees see only the **published** modules they've been **invited** to — publishing alone doesn't expose a module to everyone.

How do I track changes to a resource and who acknowledged it?

Open the resource's detail page: **Change history** shows every edit (who, when, what changed); **Acknowledgements** shows who signed each version and when (the re-acknowledgement tree).

How do I export reports?

Test results → **Download CSV** exports the current filtered view.

Does it send real emails in demo mode?

No. With demo mode on you'll see "(demo)" toasts and no emails are sent.

Spanish & language

The screenshot shows the 'Your training dashboard' for a user named 'Test Employee'. The dashboard includes a search bar, a sidebar with navigation links (Dashboard, Modules, Resources, My Progress, Help), and a main content area. The main content area features a large orange box with a quiz result: 'You scored 50% — needed 85%'. Below this, it says 'You have 1 attempt(s) left. The retake covers the same material — review it, then try again.' and 'Retake quiz now'. A button 'Retake quiz now' is also present. Below the orange box, there's a link 'Open Module Ops - Test Module for Training materials' and a note 'Training day has passed'. The 'Your 5-module program' section shows two modules: 'M3 Module Ops - Test Module for Training' and 'M1 HR'. The bottom right shows 'Your stats' with a button 'ES' for switching to Spanish.

Switch the app between English and Español from the account menu

What's translated to Spanish?

The whole **employee** experience (menus, dashboard, modules, the quiz, resources, progress, certificate) plus **quiz questions** (AI-assisted). Admin and Department-Lead screens stay in English.

What if a question isn't translated yet?

The English version is shown so the quiz never breaks. Translations are added and cached automatically; an admin/lead can also translate a question on demand.

For full step-by-step details, see the Admin, Department Lead, and Employee guides, and the Platform Overview.
